

Exp.No. 9 Monitoring and Detecting Multiple Failed Login Attempts Using System Logs in Kali Linux

Aim

To simulate multiple failed login attempts and analyze authentication logs to detect suspicious login activity using system journal logs in Kali Linux.

Objective

- To understand authentication logging in Linux systems
- To generate multiple failed login attempts
- To monitor authentication logs using system journal
- To analyze failed login attempts for incident identification

```
(unknown@kali)~$ su root
Password:
su: Authentication failure

(unknown@kali)~$ su root
Password:
su: Authentication failure

(unknown@kali)~$ su root
Password:
su: Authentication failure

(unknown@kali)~$ su root
Password:
su: Authentication failure

(unknown@kali)~$ su root
Password:
su: Authentication failure

(unknown@kali)~$ sudo journalctl | grep failure
[sudo] password for unknown:
